1. Headings

Heading Level 1

Heading Level 2

Heading Level 3

Heading Level 4

2. Semantic Styles

This is a subtitle - great for document subtitles

This is a caption - perfect for image captions

> *This is a blockquote - ideal for citations and quotes. It appears indented and in italic style.*

```
function hello() {  console.log("Hello, World!"); }
```

1. This is a footnote - smaller text for references and notes.

3. Text Formatting

Regular text, **bold text,** *italic text,* underlined text, ~~strikethrough text.~~

Combined: *bold + italic* , bold + underline , *all styles*

4. Text Colors

Red text Green text Blue text Orange text Purple text

Yellow highlight Cyan highlight Magenta highlight

5. Text Alignment

Left aligned text (default)

<div align="center">Center aligned text</div>

<div align="right">Right aligned text</div>

Justified text fills the entire line width by adjusting spacing between words. This creates a clean, professional look for longer paragraphs.

6. Unordered Lists

Bullet List:

• First bullet item

• Second bullet item

• Third bullet item

Dash List:

- First dash item

- Second dash item

- Third dash item

7. Ordered Lists

Numeric List (1, 2, 3):

1. First numbered item

2. Second numbered item

3. Third numbered item

Alphabetic List (a, b, c):

a) First alpha item

b) Second alpha item

c) Third alpha item

Roman Numeral List (I, II, III):

I. First roman item

II. Second roman item

III. Third roman item

8. Nested Lists

- Top level item 1
    - Nested item 1.1
    - Nested item 1.2
        - Deep nested 1.2.1
        - Deep nested 1.2.2
- Top level item 2
    - Nested item 2.1

Mixed Nested Lists:

1. First main item
    a) Sub-item a
    b) Sub-item b
        I. Detail i
        II. Detail ii
1. Second main item

- Note

9. Page Break Demo

This section starts on a new page! Page breaks are useful for separating chapters or sections.

10. Tables

Simple Table:

Name	Age	City
Alice	30	New York
Bob	25	Los Angeles
Charlie	35	Chicago

Table with Colored Cells:

Status	Count
Success	42
Warning	7
Error	3

Cell Borders:

Default borders	Red borders
Bottom only	No borders

11. Emoji Support (DOCX only)

Emoji characters work in DOCX (Word handles them natively):

- Hello World! ????

- Status: ? Complete

- Celebration! ??????

- Weather: ?? ??? ??

Note: PDF uses standard fonts without emoji support, so emoji will not render in PDF output.

Summary

This document demonstrates all the features available in docs_gee library:

• 4 heading levels (H1-H4)

• Semantic styles: subtitle, caption, quote, code block, footnote

• Text formatting: bold, italic, underline, strikethrough

• Text colors and background colors

• Text alignment: left, center, right, justify

• 5 list types: bullet, dash, numbered, alpha, roman

• Nested lists up to 9 levels deep

• Page breaks

• Tables with borders and colors

• Per-cell border control

• Emoji support (DOCX only)

• Document metadata: title, author, dates
